

SPECIFICATIONS

Mechanical Characteristics

Approximate Weight:	2.82 oz
Cable:	42-inch shielded
Cable Pull:	40 lb

Electrical Characteristics (Microphone)

Type:	Noise-canceling electret
Typical Sensitivity:	-38 dBV
Frequency Range:	300 to 3000 Hz

Electrical Characteristics (Earphone)

Type:	Electrodynamic
Sound Pressure Level:	85 dB minimum
Frequency Range:	300 to 3000 Hz
Impedance:	150 ohm

TACTICAL HEADSET

The Tactical Headset is a behind-the-head headset with a left earphone, noise-canceling boom microphone, and in-line PTT. Its unique

design works in conjunction with the user's ears and the steel tension of the frame to provide greater comfort. The rugged headset is built to withstand harsh environments. The headset is recommended for use by SWAT, bike patrol, mounted patrol, motorcycle patrol, K9 officers, and marine patrol personnel.
